People like you talk about their ReliaTech experience

Before ReliaTech started a Managed Service program for us, our computers were crashing all the time. Now they never crash. And I love working with our tech. He's a gem!

"I have found ReliaTech technicians to be first-class both in terms of their level of technical expertise, and in their ability to get the job done when it comes to desktop support, computer upgrades and rollouts. More importantly, ReliaTech technicians are well versed in people skills and communications. They know how to talk to the customer and to make sure the Customer gets what he/she really wants and needs."

First, thank you for offering your services to the public for such an affordable price.

I went to your location in S.F. at the Goodwill Office (on S. Van Ness) with my computer, who had a virus problem. I also needed to transfer some folder "out of" and then "back onto" my hard drive.

Your employee Nick was more than helpful! He was friendly, courteous, and incredibly smart in what he was doing. Within a few days, he was able to do the "impossible".

I was totally impressed by this young man and congratulations on having such a competent staff. Keep up the good work.

Recently I had an opportunity to bring my two laptops for service to ReliaTech. One of the laptop's I had just purchased for my daughter on her birthday. These were purchased at Best Buy.

Next day Thee called me and my laptop was ready to be picked up. I did not believe. I thought he will now ask me for a fat service fee detailing long stories. To the contrary he charged me the regular nominal fee. Both my laptops were configured.

Thee introduced me to Patrick who is a know-all expert. Patrick took 20 minutes just to explain as to what had happened to my computers and that they were fixed.

In both Techs, I did not only find an excellent service, courteous attitude and a smile, I found good folks and now my friends as well.
